

# Implementing and Administering Security in Windows Server 2003 Networks

---

Security • Durasi: **5 Hari** • Course Code: **SC-1201**

## Deskripsi

Penggunaan sistem operasi Microsoft Windows Server 2003 pada jaringan berbasis domain menuntut konfigurasi dan manajemen sekuriti yang baik. Berbagai tools sekuriti baik yang bersifat built-in maupun add-on diperkenalkan pada materi training ini.

## Tujuan Training

Peserta dapat mengimplementasikan, mengelola, memelihara serta dapat mengatasi masalah keamanan pada infrastruktur jaringan Windows Server 2003.

## Prasyarat

Telah memahami infrastruktur jaringan Microsoft berbasis domain, baik Windows NT 4.0, Windows 2000 atau Windows 2003.

## Target Peserta

Network Administrator ; System Administrator ; Technical Support ; IT Staff.

## Tinjauan Materi

- ▶ Implementing and Managing Security Policies.
- ▶ Implementing, Managing, and Troubleshooting Patch Management Infrastructure.
- ▶ Implementing and Managing Security for Network Communications.
- ▶ Planning and Configuring Authentication and Authorization for Remote Access Users.
- ▶ Planning, Configuring, and Troubleshooting PKI.
- ▶ Troubleshooting Security Policies and IPSec.
- ▶ Planning and Implementing Security for Wireless Networks.

## Training Lanjutan yang Disarankan

- ▶ SC-1101: Introduction to Ethical Hacking
- ▶ SC-1501: CompTIA Security+
